LARGEST GROWERS OF FRUIT TREES IN THE WORLD

# Harrisons' "Bud Strains"

Some fifty years ago, and almost every year since, Harrisons' have planted orchards, not alone for fruit but principally to secure the type of parent fruit tree that was characteristic of a "variety" dominant in bearing qualities coupled with health, vigor and ability to withstand changeable climatic conditions. This type of tree became the parent supplying the budding sticks for future orchards in America and true-to-name varieties were assured.

# Our Friends:

Have you a copy of Harrison's first catalog issued sixty years ago? It contained the best varieties of its time.

MESSAGE

TOM HARRISONS

Yet, today it would be obsolete. This is primarily due to the advancement of the practical method of bud selection from trees of superior strains and extra heavy bearing habits originated by Harrisons, combined with other propagation improvements fostered by leading horticulturists, as well as Federal-State Experimental Stations.

Apples, Peaches, Roses, etc .- yes! The entire list shows marvelous progress. An infinite number of new varieties, many of them superior in strain, form, color and size await the planter.

However, this abundance of new varieties has tended to confuse the prob-The Harrison organization have assumed the responsibility of choosing the best, after careful scientific and practical tests, thus avoiding those varieties that lack merit, that would produce uncertain results, consequently protecting our customers. With this objective, the Harrisons' have discarded hundreds of varieties, both old and new, and have limited ourselves to cataloging only the best in every group, from the standpoint of performance and superiority.

HARRISONS' Fruit Trees and Small Fruits are TRUE TO NAME, earlier to

and yield larger crops because they are scientifically propagated from SUPER SELECTED STRAINS. Likewise, the parent plants used for propagating our Orna-

mentals are of the finest types for their respective varieties.

We send you this catalog in the hope that you will take advantage of our high quality nursery stock which we are offering for 1944.

Appreciatively yours,

HARRISONS' NURSEPLES, Harrison Brothers, Props. G. Hale Harrison, General Manages.

# Gardening for Victory

OVER 4,000

Throughout America, millions and millions of Americans are turning to the soil to produce fruit and food for their tables and to ornamentals for relaxation from mental strains and over work. Fruit is food. Grow your own, make preparations to can as much food as possible. Food will help win the war and write the peace.

We are trying to do our part by growing thousands and thousands of bushels of apples, peaches, soy beans, corn, etc., as well as fruit trees, small fruits, ornamentals, etc., that are capable of producing a lot of food and pleasure to thousands and thousands of people on the home front.

60 YEARS OF

ACRES

# Now is the Time to Plant

Growing practices do make a difference.

Save Years of Waiting

Bud-Selection Pius Whole Root Propagation Gives Harrisons' Trees Year Ahead Start

The root is the heart of a tree. It enables nutrients in the soil to reach the tops and branches, causing growth. Every fruit tree we sell and grow is scientifically propagated on whole root seedlings, resulting in extra vigorous top and fruit growth. It costs more to grow trees by this method but results are what count. You can count on Harrisons' Trees to give you bumper crops of Quality Fruits years ahead of ordinary trees.

U. S. Government authorities are urging a large increase of Family Tree Plantings to take care the alarming decline of fruit production.

Health authorities recommend eating much vitamin-packed fruit. Many well known authorities predict that within a few years fruit production will be so low that only those who grow their own will have enough to supply their family

# Buying Fruit Trees is an Act of Confidence

Your future success and profit from your investment depends on factors you cannot see—the skill and experience of the nurseryman, the type of parent tree that is used in propagation, the willingness of the nurseryman to stand back of every one of his claims.

For 60 years the Harrison organization has been supplying fruit trees to an ever-widening circle of customers, until to-day Harrisons' Nurseries are the largest growers of fruit trees in the world. This demand we believe is due to the profit-producing proven heavy yielding, bud selected strain fruit trees we are producing plus absolute dependability and square dealings. Thousands of reports from enthusiastic customers, hundreds of year-in-and-year-out customers, are proof that you can depend on Harrisons' Fruit Trees. You buy them without risk and with assurance they will yield you the greatest possible profit.

# This is Your PROTECTION

Every customer is assured of Harrisons' Hi-Quality Trees and Plants at all times. Expert growing on proper soils, careful digging and packing is Harrisons' policy on every order. Every tree and plant we ship is guaranteed to be strictly first class, free from injurious dis-eases and insects and to reach you in good con-dition.

Any time trees or plants are received that not meet these standards they will be replative of charge or your money refunded.

Continued growth depends on soil, weather conditions, planting and after care. After ten days it is mutually understood that the nursery stock is satisfactory; however, we will replace nursery stock that thes from unavoidable causes at half price if notified within two months after its grivel.

# Harrisons' APPLE TREE for the APPLE INDUSTRY

# Apple Growing Pays Profits

UT in order to get these profits, it is neces-But in order to get these profits, it is necessary to start with the best trees and the most desirable varieties. Harrisons' Nurseries have been, and are still growing, at Berlin, Maryland, the finest and best apple trees of superior merits it is possible to produce. Harrison-grown apple trees are propagated on whole root stock, insuring an unusually large root system which is the basis of plant growth. Our apple trees are scientifically budded and grafted from selected heavy bearing strain trees of the variety desired, using the bud selection system. Today we believe that we have more of the improved and best strains of apples in our nursery than any nursery concern in America. Do not allow a few cents per tree to keep you from buying Harrison-grown apple trees, the finest and by for the best quality produced on the North American

### RESULTS COME SEVERAL YEARS HENCE

No one can measure in advance the future results of a newly planted orchard. Several years must come and go before the trees bear fruit. A good inheritance immediately qualifies it as a money-maker, fruit is large and true-to-name. Poor trees at any price never give satisfaction.

Sixty years of dependability and square business dealings finds Harrisons' today

the best place in America to buy truly dependable trees.

Millions of Harrisons' "bud selected" fruit trees planted throughout the years are today the very backbone of a profitable and dependable fruit business in all sections of the country.

### HARRISONS' TREES HAVE A GOOD RESERVE OF PLANT FOOD

Harrisons' trees are scientifically nurtured so that the trees will absorb the different latent plant growth elements so vitally necessary in the successful growth of trees after transplanting. This stored-up energy is one of the many reasons why Harrisons' trees prove successful wherever planted.

# True to Name

The World's Foremost Fruit Variety Identification Specialists Have Examined Harrison-Grown Trees and Pronounced Them True to Name

In addition to carefully selecting the propagating wood from bearing trees of superior strains, we have also employed the services of Dr. A. P. French, Dr. O. C. Roberts and Dr. L. Southwick, Professors of Pomology of Massachusetts State College, Amherst, These men are the world's foremost fruit Mass. identification specialists and they have pronounced our trees true to name.

Little Orchards Make More Profit Than Big Farms

TODAY FRUIT GROWING is gaining on the big farms—little orchards lead the way to a profitable and worth-while fruit market.

More fruit prizes are won on fruit grown in orchards planted with Harrisons' fruit trees than any other.

# Yellow Transparent

It's a Summer Apple—First of the Year

Ripens Early, Skin Clear Yellow, Flesh White, Flavor Slightly Acid, Size Medium

This is the most popular early green apple grown and has proven a profit maker in a large number of apple districts. The Yellow Transparent tree is very hardy and somewhat of a dwarf grower, bears when very young and makes an excellent filler. We believe there is a big future for the grower who plants this variety; we ourselves anticipate planting several hundred trees of Yellow Transparent this year.

Yellow Transparent First On the Market

As it ripens early in July, making excellent eating apples and selling without difficulty. There is almost no competition at this time; Yellow Transparent leads the field, and is eagerly sought for by those people who find their "apple appetites" impatient.

# OTHER SUMMER APPLES

**EARLY RED DUCHESS.** Highly colored early apples bring premium prices. This bud sport colors red all over early in the sea-

STARR. Large, attractive with bright yellow ish smooth skin; sometimes marked with a faint blush and numerous russet dots; flesh yellow, fine, very tender, crisp, juicy, aromatic and of extra fine quality, bringing highest prices. Recommended to those with nearby markets, but a poor long distance shipper. Popular in Southern New Jersey. RED SUMMER RAMBO. Harrisons' new early coloring bud sport. This new strain is much superior to the ordinary Summer

ACMDO.

YEALTHY. Medium to large size; round, almost solid red; flesh white or a little stained; tender, crisp, juicy, fine grained, aromatic and very good flavor. Relatively good keeper. Old variety most extensively planted in North. Tree is very hardy, withstanding unusually cold climates, vigorous, fruits at early age bears regular and WEALTHY. fruits at early age, bears regular and abundant crops. Tree somewhat dwarf, making a fine filler.

Harrisons' Bud Selected Apple Trees Bear Fruit Quick

A NATIONAL SCARCITY OF FRUIT TREES
There is a drastic shortage of fruit trees
throughout the nurseries of the United States;
as a matter of fact, the smallest supply available
for 1944 orchard plantings that there has been
at any time during the past fifty years.
A recent national survey shows that fruit
trees will even be scarcer during the next coming two years than now. Play safe—act quick—
place your order now while trees are available.

# **GOOD FALL AND WINTER APPLES**

BALDWIN. Large, red, yields big crops, good keeper. Winter

CHERRY RED STAYMAN. Many growers, especially in certain districts, have some trouble getting enough color on their Stayman Winesap, who want more and darker color. This strain is lighter in color than Dark Red Stayman, but darker in color than Scarlet Red Stayman, otherwise its characteristics are the same as ordinary Stayman in fruiting, etc.

DARK RED STAYMAN. The darkest of all our Stayman Winesap strains. It is especially recommended for growers who want the dark or almost black-colored apples. It is a heavy yielder, but we prefer any of the other strains that we offer to this one.

JONATHAN. Medium to large, red, juicy. Good keeper and an excellent

LOWRY. Beautiful mahogany-red, good, medium size, round oval shape, nearly sweet, mild sub-acid; excellent flavor, good shipper, long keeper, and sells at fancy prices in export as well as domestic markets. New popular commercial variety in Virginia.

MAMMOTH BLACK TWIG (Paragon). Extra large in size and round; skin smooth, yellowish covered with deep red, the general effect being dark red; flesh tender, tinged with yellow, crisp sub-acid, aromatic, fine flavor, of excellent quality, long keeper of great value. An important commercial variety in the East. Tree is vigorous and healthy, yields big crops. Plant Delicious or Jonathan as a pollenizer.

NORTHERN SPY. Large, bright scarlet-red, with yellow markings. Flesh juicy, rich, crisp, tender, aromatic and highly flavored. Tree a strong erect grower, very healthy, extremely hardy and a free producer. We offer an exceptionally heavy bearing strain that comes into bearing at an early age. into bearing at an early age.

ORTHWESTERN GREENING. Large, round, greenish yellow; juicy, firm, good quality; splendid keeper, ships well. Attractive apple when packed in bushels, demands good prices, excellent baking apple. Should not be planted extensively, because crops are not so certain, due to blossoming early. Trees are extremely hardy, vigorous, and bear very young. NORTHWESTERN GREENING.

**RED GRAVENSTEIN.** This red sport is more attractive than Gravenstein. It differs from Gravenstein only in the solid dark red fruit.

RHODE ISLAND GREENING. The Popular Northern Apple. Large, greenish yellow; flesh crisp, juicy, quite acid, firm, fine grained, tender, and of very fine flavor and quality. An excellent keeper, a popular barrel apple; brings good prices. Generally planted in New England, New York, Michigan and Canada, but not advisable to plant south of the Mason-Dixon line.

ROME BEAUTY. Large, round, red, flavor and quality

STAYMAN WINESAP Big Yield Strain. Without a doubt the heaviest yielding strain of Stayman Winesap obtainable. This strain yields bumper crops year after year. It colors to a good bright red and gets nearly solid red colored when allowed to stay on trees until fully ripe. This is an improved strain and is preferred by many growers in the East. Tested and time-proven by thousands of growers.

by thousands of growers. TWENTY OUNCE. Very large, yellow striped with red; fine quality, good

WINESAP An Apple Favorite in Virginia. Sometimes called Old Winesap and Virginia Winesap. Medium size, oblong, smooth, and a fine dark red—one of the best red colored apples grown; flesh yellow, crisp, tender, very juicy, oromatic, firm and of excellent flavor. Very long keeper and considered the best cold storage variety, keeping until July. Strong grower; comes into bearing early. Our strain produces bumper crops of the larger sized apples with plenty of color.

YORK IMPERIAL. Medium to large size, round, irregular, greenish yellow overlaid with bright red; flesh tender, firm, crisp, and of high flavor; wonderful keeper. Can be kept in cold storage until June. Tree is a vigorous grower, strong and healthy; an unusually heavy bearer.

SUPER RED McINTOSH-A Northern Favorite

SCARLET RED STAYMAN—Tops with Many Growers

# BRIGHT RED

We searched the country over to find a strain of Jonathan that had more color than our selected Big Yield Strain Jonathan. After thousands of miles of travel inspecting all of the new strains of this famous variety we found the one we had been looking for. It colors solid red several days earlier, otherwise it is identical with ordinary Jonathan Growers who want more, deeper colored apples will find our Bright Red Jonathan the best colored strain obtainable.

# THE APPALACIAN WINNER RED YORKING (U. S. Plant Patent No. 125)

The Red Yorking is a "bud sport", being a mutation of the famous York Imperial. This "bud sport" originated on a tree, grown with other York Imperial trees, in Harrisons' Nurseries and later sold to Mr. W. H. Allison, near Shippensburg, Penna, for use in planting a large orchard about 30 years ago.

# McINTOSH

An improvement on our already famous strain of McIntosh Red. Color is slightly darker and commences to color weeks earlier.

# SCARLET RED STAYMAN BRILLIANT COLOR

We offer to the public the greatest strain of Stayman Winesap ever discovered. It is a true bud sport found in a Stayman Winesap orchard Scarlet Red Stayman takes on bright red color weeks earlier than ordinary Stayman. Its ripening date is the same but can be picked earlier if desired.

# A Ready Market at Top Prices

Scarlet Red Stayman is the best general purpose apple for planting in the East. Its solid scarlet-red color and its bright attractive finish causes it to command highest market prices. The fruit is large and it produces bumper crops each year.

RED SPY-Bears Crisp, Juicy Apples

# SOLID RED WINESAR

Old Winesap generally has plenty of color when planted in most sections, but for those growers who want a more solid redcolored Winesap, we recommend our new strain.

# RED ROME BLAVITY

An improved Rome Beauty, identical in vigor and production. Color of fruit much brighter and solid red. Produces much higher percentage of fancy apples and also superior in quality to the ordinary strain of Rome Beauty. Red Rome Beauty is renowned for bearing at a very early age, producing bumper crops of large size apples. The tree is a vigorous, strong grower, exceedingly hardy.

### MeINTOSH LED

### Improved Type—Heavy Yielding Strain Preferred by Many Growers in the North

Until the discovery of our New Super Red McIntosh our improved McIntosh Red was the best strain of McIntosh available. It colors solid red when climatic and soil conditions allow it to remain on the trees until it is mature. This heavy yielding strain is much superior to many strain of McIntosh, especially the dull striped kinds. If you do not have trouble getting sufficient color then we recommend you planting this time-proven, heavy yielding strain. McIntosh Red is very hardy and produces bumper crops each year. Generally considered as the best flavored apple grown. Recommended for home or commercial orchard plantings.

# GET YOUR ORCHARD STARTED THIS YEAR

RED ROME BEAUTY Quality and Appearance

# HED SPY

A new "bud sport" from New England. Identical with the ordinary Northern Spy in fruiting habit. Extra large size fruit, strong, vigorous, hardy trees. Comes into bearing earlier than the ordinary strain. Colors early, nearly every apple being solid red in color. We recommend it for commercial and home plantings in northern states.

# King of All Red Apples

# HIPLE RED

Solid bright red color month earlier than the original Red Delicious. Has all the fine qualities of famous parent strain. Plant Harrisons' Triple Red Delicious to insure your future financial income.

# Glorified Red Apple of the World

Ideal for Home Orchards

Harrisons' Triple-Red Delicious is not only a commercial apple, but it is every bit as well adapted to the home grounds. Whether you wish to plant a thousand or if you have room for only one tree, Harrisons' Triple-Red Delicious will give full value.

Harrisons' Selected "Big Yield" Strain BEST HOME ORCHARD APPLE

Autumn, medium sized, golden yellow, tender, rich, aromatic, sub-acid, delicious, possibly the best flavored apple known, and a good keeper. No better variety exists for eating raw or for cooking. Tree is very hardy and one of the heaviest bearers known, producing extra large crops annually. Excellent variety for a filler, as it comes into bearing very early. Grimes Golden is the best pollenizer known, especially for Stayman Winesap, Turley, Baldwin, Cortland, Rome, Winesap, McIntosh and others. Be sure to include Grimes Golden in your orchard. IT IS EASY TO GROW.

It's Golden!

A golden yellow apple with decided "Delicious" characteristics. Yellow Delicious has a remarkably good flavor, and is most popular for eating during the fall and winter months. Late September and January finds it at its best. Many people think it superior to the famous Delicious. Fall.

A Prolific Cropper at an Early Age

The Yellow Delicious tree is very thrifty, hardy, and a vigorous grower. It is renowned for its heavy bearing of fruit at a very early age. You can depend on a good yield of ripened fruit each year.

# Grown on the "Brink" of the Atlantic Real Hardy Grown Stock You Can Depend On

Our favorable climatic conditions, being located only 8 miles from the Atlantic Ocean, with our rich soils of various types, coupled with the latest scientific and practical methods, as well as an unusually large number of experienced nurserymen, with ample facilities, enables Harrisons' to grow America's foremost, finest and best quality, true-to-name fruit trees, with superior merits and extra heavy annual bearing habits, which we guarantee, with proper care, will produce bumper crops in any fruit growing section of the United States.

A Nursery Sectional View of Harrisons' Peach Trees Growing at Berlin, Maryland

# Harrisons' Peaches ARE A COLLECTION OF THE WORLD'S BEST

# VERY EARLY VARIETIES

JUNE ELBERTA. A big, handsome red and gold peach, highly colored, excellent quality and a dandy home peach, being a new variety. One of the earliest of the good yellow-fleshed peaches, this semi-freestone variety quickly returns cash dividends before later varieties reach the market.

EARLY ROSE. Very early. Another favorite commercial peach. White, cling, medium large size for an early peach, high bright red skin, sweet, delicious flavor. Good shipping, making it a new favorite among commercial varieties.

EARLY HALE-HAVEN. A bud sport of the well-known Hale-Haven, retaining all its characteristics, such as large size, high red color before ripening, extra fine flavor, and yet ripening a week earlier. Tests show it will keep as good as the Hale-Haven. A very promising new commercial variety. We recommend every grower to plant a few trees so as to compare its merits with other varieties ripening at the same time. We are confident that you will like Early Hale-Haven and that it will be a profitable peach for you to grow. Plant Patent No. 325. Ten cents per tree extra.

CUMBERLAND. An outstanding favorite early white peach. A comparatively new, white, nearly freestone variety that was developed by the New Jersey Experimental Station. The fruit resembles Belle of Georgia, both in appearance and quality, although it ripens about the same time or a little before Carman.

It's Easy to Grow Delicious Healthful Peaches

## YOUNGER BEARING

\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*\*

Do you want your trees to come into bearing at an early age? It is a recognized fact that trees propagated direct from bearing trees will commence to fruit at an earlier age than trees that are propagated from nonbearing scions. Harrison Grown Fruit Trees, due to the fact they are propagated from bearing trees, will produce profit-paying crops in the earliest possible time.

# Early Midseason Peaches

CHAMPION. A Good Home Peach. White, freestone, very large, creamy white with red cheek, sweet, juicy, very high flavor. Champion has lost its past commercial importance because it will not carry satisfactorily under refrigeration, but as a home garden or a roadside peach, it is one of the best. Tree is hardy, large grower and productive.

GOLDEN EAST (N. J. 87). Early midseason, very large, high red color, yellow, freestone.

HILEY. Early midseason. Bears huge crops of fancy peaches. White, freestone, medium size, highly red colored and is a very handsome peach of exceptionally good flavor. Tree is strong grower, very healthy and an extra heavy bearer. You can depend on Hiley to bear heavy crops year after year. The marvelous color and wonderful flavor have made it popular on the markets.

ROCHESTER. Early midseason. Yellow, freestone, large, covered with mottled red blush; flesh yellow stained with red at pit, very good quality, prolific bearer. One of the best early midseason yellow freestone peaches for nearby markets, and highly desirable for cannina.

**SOUTH HAVEN.** Early midseason. Yellow, freestone, large, handsome, uniform size, delicate flavor, ripens about 15 to 18 days ahead of Elberta. Tree is very hardy, good grower and a consistent heavy bearer, adapted to cold climates; produces bumper crops in mild climates.

Harrisons' volume production has enabled us to supply you with high quality nursery products at low prices. All varieties are within reach of any home planter and fruit grower and priced to save you money. We ship everywhere. State and Federal inspected.

Harrisons'

# Belle of Georgia

Midseason. Large, white freestone, recognized as the best all around white peach. Should be included in every planting. Very hardy and pro-

# ELBERTA (Original Strain)

# Internationally Famous—The Standard by Which All Other Peaches are Judged

Midseason. Yellow, freestone. Fruit is large to extra large; golden yellow with brilliant shades of red; firm, juicy, rich, sweet and good flavor. Elberta has the greatest international reputation of any peach. It has been the standard for all other peaches almost since the date of its introduction. The coloring of Elberta is practically perfect. The rich, yellow skin is almost entirely covered with dark red blush upon the sunny side. The attractive appearance and the uniform large size serve to sell it almost on sight. We offer original strain trees which is the best strain obtainable.

# Save Disappointment—Plant Only ORIGINAL STRAIN Elberta

Today, there are more than seven distinct types and strains of Elberta, bearing fruit in the orchards of this country. To compare the various sizes, shapes, texture and red coloring of these Elberta with those grown "on original strain trees" gives sufficient reason why they sold this year at a premium of \$1.00 to \$2.00 per bushel on the New York and other leading fruit markets.

# Original Strain J. H. HALE

Our "Hales" are propagated direct from the original strain, the variety originated by the late J. H. Hale of South Glastonbury, Connecticut, and Fort Valley, Georgia, known as the Peach King of America. There are many types and strains of J. H. Hale grown, but the only one worthy of commercial importance is the original strain, which is the extra large, round, highly colored peach. original strain necessitates cross-pollenization and it is necessary, for proper results, to plant a few Belle of Georgia or Hiley along with Hale for cross-pollenization.

**Extra Large Size** Yellow, freestone, extra large, beautiful red coloring, firm and of the highest quality and enticing flavor. J. H. Hale ripens about 2 or 3 days prior

America's Highest Price **PEACH** Plant Now!

### TWO WEEKS LATER THAN ELBERTA

The Rio-Oso-Gem would be a peach of commercial importance when ripening at any time during the peach season but it is very fortunate that it ripens two weeks later than Elberta, which puts it at a time when there is no other variety of commercial importance as a competitor, and fills a long looked-for gap in commercial production, ripening when the markets are clamoring for peaches—this variety has sold at very much higher prices than Elberta and J. H. Hale. To prolong your peach shipping season, we highly recommend to you planting the Rio-Oso-Gem. Harrisons' have planted twelve thousand Rio-Oso-Gem in their own famous orchards. We have the utmost faith in the Rio-Oso-Gem, and we will also make future plantings of this remarkable peach.

There is a brilliant future in store for the progressive orchardist who plants Rio-Oso-Gem peach trees.

# Harrison's "Big Yield Strain" MARY WASHINGTON

# Highly Profitable and Easily Grown

Being the first vegetable to come in the spring it always brings a high price on the markets. Stalks being delicious and very healthful, every garden should have a generous supply and when properly set and cared for will last a lifetime.

# The Famous True-to-Name Mary Washington

Plant This Pedigreed Strain

There is no variety of asparagus as good as Mary Washington and whether you are growing for home use only or for market you cannot afford to grow any other. This wonderful new asparagus was developed and introduced by the U.S. Department of Agriculture and although it is just a recent introduction it has become famous the country over.

## Rust Resistant—Profitable

Growers everywhere are discarding all other varieties in favor of the famous Mary Washington, because it is earlier, the stalks are larger, more tender and more productive than any other variety and more highly immune to rust, which means that one planting will produce profitable crops for many years.

# Large—Early—Tender—Juicy

Asparagus buyers now demand Mary Washington and are willing to pay fancy prices to get it. The demand for Mary Washington is tremendous because when it is once eaten, no other variety will give satisfaction. The stalks are purplish green color, large, tender and juicy. A very rapid grower, which means many cuttings.

# BARTLETT

For home, for canning, for market, the best. Ripens during summer

during summer.

A golden colored pear, with a red cheek on most specimens. Bartlett mellows and is excellent for eating very early in the fall, yet when picked a week before it is ripe, and properly stored, will keep till late. Flavor delicious and musky; flesh buttery, rich and juicy. One of the finest pears that grows, to eat raw. A mingling of the flavor of Bartlett pear and quince gives about the finest taste of any food this world's folks have. Bartlett trees bear early, produce enormous crops, and are not nearly so subject to damage by insects and disease as some other sort. The trees do especially well with high culture.

# Fancy Bartletts Bring Highest Prices

Bartlett pears always sell on the markets even when other sorts are not in great demand. The fruit is so handsome and appealing that it pays to pack it in fancy containers. Bushels or bushel boxes are best adapted. The fruit ought to be sorted and graded, wrapped in tissue paper, and arranged in the container practically the same way that you pack apples. Pears are sometimes packed in peach carriers, and sell to good advantage. Plain fruit can be sold without wrapping, in small baskets or boxes.

One or two Bartlett pear trees in the city yard will furnish a considerable amount of fruit; a half dozen will supply the family with fresh fruit and a surplus for preserving.

# PLANT BIG TREES for QUICKEST and BEST RESULTS

# SURE CROPPER EASY TO GROW

Of all the pears, Kieffer is the most easily grown. Trees are vigorous, exceptionally hardy and thrive on varied soils in any climate. Kieffer is the only pear that can be successfully grown in such southern states as Alabama, Mississippi, Louisiana, etc., and yet it is the leading commercial pear in Canada. Kieffer is blight-resistant, and can be successfully planted in large orchards.

This fruit is large to very large size; skin yellow, with light vermilion cheek; flesh yellowish white, very juicy. Noted for being a long time keeper. Most popular can-

A leading commercial variety. New method of storing enables Kieffer pears to have as good flavor as other varieties.

LATHAM

A Blue Ribbon Winner for the Home and Commercial Grower. It Simply Cannot Be Equalled.

The sensational yields of this variety have attracted the attention of growers everywhere, and all those who have given it a trial are praising the many unusual features they have found in Latham. After thoroughly testing Latham we find it a remarkable variety in every respect; you will be both delighted and surprised after giving it a trial.

Tremendously Productive; Large Berries. Latham is a tall, vigorous grower the canes are extra heavy, well able to support the locd of fruit. The foliage is healthy, dark green, tough and leathery highly resistant to insects. Latham ripens with Cuthbert. Covers a longer fruitens with Cuthbert. Covers a longer fruit-ing season. The berries are beauties and will cause a sensation wherever they are shown. Many are over an inch in diam-eter and they hold this size to the end of the season. Color dark rich red.

HARRISON BROTHERS BERLIN, MARYLAND

# The New Mammoth Berry That Will Revolutionize the Berry-Growing Industry

Two Inches In Length

The new Boysenberry is truly a glorified Youngberry. We offer it again this year because of the tremendous large size of the berries; because of its very prolific fruiting; and lastly, because we think that it has the highest qualities of all bramble fruits.

They are just as easy to grow as blackberries. They produce a larger crop, not because there are more berries, but because each berry is so much larger. Has a rich, tangy flavor all its own.

No. 1 plants: 6 for \$1.45; 12 for \$2.10; 25 for \$3.30; 50 for \$5.50; 100 for \$9.75; 250 for \$22.50.

## **BLUE GRAPES**

## CONCORD

Best of all grapes. For description, see opposite page.

**CLINTON.** Blue. Late. A rank grower, hardy; bunch and berry small to medium size, slightly juicy and spicy. Ripens 2 to 3 weeks after Concord.

FREDONIA. Blue. Very early. Originated by New York Experimental Station. The bunch and berry are large, with excellent, juicy, delicious flavor. Vigorous and productive. Ripens fully 10 days before Moore's Early.

IVES. Dark blue. Midseason. Quality good when fully ripe. Produces a successful market grape.

MOORE'S EARLY. Blue. Early. Bunch and berry very large. Equal to Concord in quality, health and hardiness, but ripens about 10 days earlier. It is a fair grower, valuable for garden and vineyard.

WORDEN. Blue. This excellent grape is as hardy, healthy, vigorous and productive as Concord, of which it is a seedling, but better in quality. It is sweeter, larger in bunch and berry. Several days earlier. Valuable for garden and vinevard.

## RED GRAPES

AGAWAM. Red. Midseason. Large. thick skin, aromatic flavor. Vines strong, rank grower. Hardy and productive. Ripens with Concord.

CACO. Red. Midseason. Fruit is very large and handsome. A rich winered color. Not a very rank grower and a shy bearer.

CATAWBA. Red. Very late. Large. Flesh pulpy with rich vinous flavor. Quality good. A very desirable va-

DELAWARE. Red. Early midseason. Bunch and berry good size, compact, flesh juicy, very sweet and refreshing. Vine very hardy and productive. A slow grower. Re-Vine very hardy and quires rich soil, good culture, close pruning.

SALEM. Dark red. Midseason. Bunch and berry large. Flesh sweet, tender, with rich vinous flavor. Good keeper, vigorous and productive.

## WHITE GRAPES

**ELVIRA.** White. Early. Bunch and berry medium size. A good grape. Very hardy, productive.

NIAGARA. White, Midseason, Best of the standard light-colored grapes. Bunches of large greenish white berries change to pale yellow when fully ripe. A rank grower and very productive. Popular with vineyardists and home gardeners in the North, as well as the South.

# CULTIVATED BLUEBERRIES

# LEADING BLUEBERRIES Listed in Order of Ripening

CABOT. Plants seldom exceed three feet in height and make a broad, low bush. The color of the new growth in winter is a light red over olive. The large berries have a delicious sub-acid flavor.

ANCOCAS. The bush of slender, vigorous, upright habit rarely surpasses five feet in height. The winter twigs are a dark red. The berries are somewhat larger than those of Rubel and begin to ripen several days earlier.

**CONCORD.** The bush is of upright habit and at maturity exceeds six feet in height. The young growth is bright red in winter. The berries are large, frequently reaching three-quarters of an inch in diameter.

They usually ripen a few days earlier than Rubel and are fine in flavor and appear-

developed bushes stand six feet high and the winter color of the young wood is a rich red. The large berries of fine color are usually ready to pick the first week in July. Best commercial variety.

JERSEY. The bush is of vigorous habit and grows very large. The winter color of the young growth is a light red over golden brown. The berries are the largest of any here listed, light blue and ripen about the same time as Rubel.

# Early

### Large Fruit-Vigorous Grower-Heavy Crops

Derries average large size considerably larger than the nifact their size is comparative with Chesapeake which is inding ate berry. Plant growth is exceedingly vigorous, befre vigorous than most other varieties. Dorsett yields large fancy light red berries.

# Early

# The Sugar-Saving Berry

. deep full red; its rich, sweet flavor brings buyers back Foirfax berries are exceptionally firm, making it an ideal superior to all for nome use, equal to any for commercial

# PICK WORLD'S FINEST BERRIES FROM YOUR OWN PLANTS A Big Profit From Your Own Back Yard

Everybody prefers the flavor of vine-ripened strawberries They are more delicious and usually sell for 10c to 20c more per quart. Customers pay premium prices for garden fresh strawberries and small growers make real money, up to \$500.00 per acre.

Whether you have a small garden or several acres, you can make a big extra cash income by planting Harrisons' "Big Yield" strawberries. Others are doing it, why not you It costs only a few dollars to get started

King of the
Early Berries
Too well known to need much description. The standard early berry by which all other varieties are judged. Holds all records for big crops and big profits. Premier has filled more crates, made more dollars, and brought joy to more strawberry growers than any other variety ever grown

Adapted to All Soils—Heavy Yielder. It thrives on most any type of soil and is a rampant plant maker. Premier fruits extra early when berries are selling at a high price. It is a big yielder of big bright red berries of fine flavor. For home garden, local market, or for shipping moderate distances it has outclassed all the other va-

# The Old Reliable Midseason Variety LARGE YIELD-FANCY FRUIT-FINE FLAVOR

Big Joe is a heavy producer of large, brilliant red berries of extra fine flavor and is firm enough to withstand long shipments. The plants are good growers and heavy yielders. This variety succeeds on all types of soil but does extra well when given good care and fertility. Be sure to include some Big Joe in your planting this spring. Our big yield strain insures big crops

# Midseason

A midseason berry that will produce the largest crop of bigger berries of any midseason variety we know. Catskill is entirely satisfactor, as to firmness, quality, color and attractivenes, season of ripening and climatic adaption. The highest record of marketable berries was made with this variety. In shipping respects it ranks with Chesapeake and Lupton. It is rated equally as attractive as Fairfax or Dorsett. The berries are borne on rather long fruiting stems which makes it easier to get at in picking

The Favorite
Late Berry

I large berries that hold their shape well until vield as many berries per acre as some and quality of its fruit enables it to sell this disadvantage. The berries are and to arrive in first-class condition but equally adapted for home strain It is a good p the end of the of the early v tor a much t

HERE'S A NEW ONE

Extra Good—Very Late

This is the other new one by the USDA, and a cross between the Chesa-ake and Fairfax. This is the late one. Berries are large, and are borne on fort stout stems that stay well under the leaves, thus protecting them from the control of t

4. Pick 3rd crop, August to frost, 1945.

### 3 REAL CROPS—3 BIG PROFITS

Bears in 90 days, and, too, it's the best Family Garden Strawberry

Loads of Big Berries in 90 Days

Unlike the other varieties, Mastodon begins to bear luscious berries three months after planting and bears three big crops in eighteen months. Customers have reported yields as high as three quarts per plant the first fall.

### Why Wait a Whole Year?

Plant Harrisons' "Big Yield" Mastodon this spring and grow your own berries this summer and fall, instead of buying them. If you have more than you can use, they are easily disposed of in the nearby community, where they will always bring top prices.

# Gem Everbearing

New Companion for Mastadon

Get Your Berry Patch Started This Season

Bears
100 Days
After
Planting

Gem will start to bear the first season planted and will bear large crops until frost. These berries bring the highest prices in the markets or on a roatside stand. There is a great opportunity for making money by planting Gem. Get your patch started this season; they will give you enough berries for your own family and some to sell to your neighbors or ship to the city markets.

# **APRICOTS**

Fine for Canning

The apricot is one of the most delightfully luscious fruits grown, when eaten fully ripe and fresh from the tree. It is remarkable that such a rich and beautiful, golden, sweet fruit is not planted more, especially since it ripens just after the early cherries and before the best early peaches.

ALEXANDER. Early, prolific, freestone, orange, with red blush; very juicy and sweet flavor. A large prolific sort that will withstand adverse weather conditions. This variety deserves greater popularity. The best.

EARLY GOLDEN. Pale orange, juicy and sweet. Is a hardy, prolific bearer; ripens first of July.

SUPERB. Very good quality. Fruit is beautiful, light salmon-colored, best of the older varieties. Tree is large, very thrifty, hardy and is extremely productive in fruit.

# NECTARINES Delicious for Eating

There is a mistaken idea that the nectarine is a cross between the peach and something else, while it is really nothing more or less than a smooth-skinned peach. The melting, juicy texture of the nectarine and its delicious flavor furnishes one of the most delightful fruits for eating during the summer. Plant a few trees in your home orchard this year.

HUNTER. Large, round, yellow, freestone

**SURE CROP.** Very vigorous and productive. The fruits are large, roundish, white and overlaid with very attractive red. Very pleasing flavor.

ALTHEA or ROSE OF SHARON (Hibiscus syriacus). The double and single flowers are formed in varying colors. We can supply double red, white with crimson center, and double white.

BUDDLEIA MAGNIFICA. New and undoubtedly the finest of all the summer-flowering Butter-fly bushes. Large bright lavender panicles. Flowers do not sunburn as do other varieties. Foliage heavy rich dark green. Very hardy.

**DEUTZIA, PRIDE OF ROCHESTER.** Double white flowers, slightly tinged with rose, appear in mid-June.

**DOGWOOD, RED-BRANCHED** (Cornus alba sibirica). Bright red bark, white flowers, blue fruit; rapid grower; beautiful winter effect.

GOLDEN BELL (Forsythia). Vigorous, upright grower; profusion of yellow flowers in April. One of the best early blooming shrubs.

**HONEYSUCKLE BUSH** (Lonicera morrowi). Early white flowers in June, followed by red berries.

**SPIRAEA BILLIARDI.** A hardy type of spiraea that grows exceedingly well in dry places. Long, fluffy flower spikes. We offer two colors: white and pink.

SYRINGA, SWEET MOCK ORANGE or GARLAND (Philadelphus coronarius). Of upright habit, and produces in June a wealth of white, fragrant flowers.

**SWEET-SCENTED SHRUB** (Calycanthus floridus). Hardy native with many double, chocolate-colored flowers in May. Flowers, leaves and even the wood have a spicy fragrance.

**TAMARIX, AFRICAN** (Tamarix africana) Feathery gray-green foliage, very showy.

**TARTARIAN HONEYSUCKLE** (Lonicera tatarica). Very attractive in blossom, producing an abundance of flowers followed by red fruit. We offer pink and white varieties.

**WEIGELA, PINK** (Weigela rosea). The most popular weigela sold today. Its delicate pink, bell-shaped flowers are borne in great profusion along arching branches.

CREPE MYRTLE (Lagerstroemia indica). Small green, glossy leaves; very beautiful showy flowers during midsummer to fall; noticeable object in any landscape. Not hardy north of Mason-Dixon line, but most popular southern shrub. Pink and red varieties. 1½ to 2 ft., each \$1.25.

FIRETHORN—Orange Berries All Winter

beautiful shrub covered with a profusion of white flowers in early spring, followed by bright orange berries which hang on all winter. 1½ to 2 feet, \$1.75 each.

HYDRANGEA PEE
GEE (Hydrangea paniculata
grandiflora).
Large flowers;
first snowy
white, then pink
changing to
reddish bronze
in the fall.
Blooms mid-

summer to fall. 18 to 24 inches, 75c each.

**QUINCE, FLOWERING** (Cydonia japonica). Scarlet flowers in April and May. No doubt one of the most attractive spring blooming shrubs. 1 to  $1\frac{1}{2}$  feet, 60c each.

SPIREA ANTHONY WATERER. Crimson flowers in large, flat clusters. Blooms early and continues till fall. 15 to 18 inches, 65c each.

WEIGELA EVA RATHKE. Very attractive deep carminered flowers, making a very showy shrub. 11/2 to 2 feet, 60c each. 2 to 3 feet, 80c each.

NANDINA DOMESTICA. Leaves deep, glossy green, when young tinged with red. In winter beautiful coppery tones are assumed. White flowers produced in long panicles followed by masses of small, bright red berries which are retained all winter. 12 to 18 inches, \$1.00 each.

BEAUTY BUSH. Pink tubular flowers, heavy bloomer, hardy. 2 to 3 feet, \$1.00 each.

TARTARIAN HONEYSUCKLE

HYDRANGEA P. G.

# The Glorious Spirea Van Houttei

This grand shrub has done more to beautify the homes of America than any other variety. It is valuable as a specimen in groups in border planting and for hedges. The branches are slender, drooping, covered with white flowers in April or early May. It grows in any place either in full sunlight or partial shade. Disease resistant, hardy, thrives under adverse conditions. Ultimate height 6 to 8 feet but can be kept lower by trimming. The most popular shrub. We have an extra fine supply of first class plants this year and are pricing them especially low.

Plant DWARF BOXWOOD Along Your Walk

# DWARF ENGLISH BOXWOOD

Ideal for Dwarf Hedges. Make your home grounds the show place of your community. Dwarf English boxwood is the ideal low growing plant to add the finish touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be trimmed if desired, but not necessary, unless you want the stirctly formal effect.

ui	IICS			ENGLISH	BOXWOOD	
				\$0.7	2 for 5 \$1.40 5 2.00	\$6.50

Very similar to green barberry, except it grows upright instead of spreading; glossy green foliage, pyramidal habit, bears a profusion of scarlet berries which stay on the bush well into the winter months. May be trimmed any desired shape. Hardy, can be used for hedges or individual specimens without pruning.

GREEN BARBERRY—Green in the summer, turning to a brilliant coppery red in late fall, a protection against small animals, because of the sharp thorns. This type of hedge is practical and inexpensive.

UPRIGHT BARBERRY

BUSH ARBUTUS-Everblooming

# BUSH ARBUTUS Abelia Grandiflora

One of our beautiful, popular and satisfactory blood-leaved evergreens. The graceful, drooping stems and branches are covered with dark, glossyleaves, which in winter assume a metallic sheen. From the middle of June until frost, this plant produces an immense quantity of tubular-shaped white flowers finged with pink, about an inch long, which are borne in clusters. Good for shady locations. shady locations.

# Compact-Deep Glossy

Our boxwood has deep glossy green leaves. They are dense, compact specimens, having been sheared many times. The leaves on this variety are small and resemble the dwarf English boxwood. This variety is a dwarf grower, but it makes much faster growth than the English boxwood. For those who want large boxwood plants in a few years, this is the best variety to this is the best variety to plant.

AMERICAN BOXWOOD

# Dwarf English Boxwood

(Buxus Sempervirens Suffruticosa)

A widely known and popular form of dwarf boxwood: It has small deep green dense leaves which hold their bright color throughout the winter months. Suitable for very low hedges and edgings; can be trimmed in various forms.

Easy to Grow. Dwarf English boxwood is easy to grow and will thrive in most every type of soil. After this plant once becomes established, it does not require any particular attention. It is proctically immune from all diseases and insects. Can be planted in the full sunlight and semi-shady locations.

in the full sunlight and semi-shady locations.

Large Specimen Plants Sell at High Prices. Dwarf English boxwood has been called the "Century" plant, due to its ability to live over a hundred years. A few years ago, large plants sold for fabulous prices, many selling for hundreds of dollars.

Ideal for Dwarf Hedges. Make your home grounds the show place of your community. Dwarf English boxwood is the ideal low growing plant to add the finish touches to your home grounds. It stays green all winter and provides your planting with year around beauty. Can be frimmed if desired, but not necessary, unless you want the strictly formal effect.
